## COMPANY INTRODUCTION

Binet Technical Services<sup>®</sup>  
1996 - 2010

**BINET TECHNICAL SERVICES (BTS)** was formed in 1996 and operates in the global field of construction, concentrating on mechanical work, overland slurry piping, structural erection and platework, including the design and detail drawing thereof. Other related disciplines can be accommodated. All the project management is done in-house as part of the installation of our projects.

**BTS** has purpose built a lot of its own equipment, as the kind of safe modern machines that are required are difficult to obtain. All the relevant machines are fully certified according to the MOSH, OSH acts. We have the most advanced equipment, thus ensuring that the work carried out is guaranteeable.

**BTS** started operating due to the need to diversify to accommodate the changing scope of operations it is now capable of performing. The company started as a small concern, but whilst growing, has retained the prerequisite for tight control and good quality, so that in turn more competitive pricing can be offered.

**BTS** has also built a number of machines that are capable of working on the side slopes of slimes dams. We consider working on side slopes on slimes dams a speciality.

## COMPANY POLICY

The prime objective of **BTS** is to deliver top quality work at competitive prices as efficiently as possible, using a very experienced labour force.

To ensure that we meet our objectives we have built up a sound team, using experienced labour and supervision, capable of complying with all the current quality and safety standards and relative codes of practice, and achieving these requirements in the best possible time.

## COMPANY ENVIRONMENTAL POLICY

The company strives to comply to all the required environmental policies codes of practice and all standards required for the safe implementation of the different disciplines required to perform. **BTS** has extensive experience in the environmental maintenance and upgrading of the environment in the mining/remining field. Maintaining the smallest carbon footprint possible

## COMPANY QUALITY POLICY

It is company policy to deliver a quality product or service, to the highest standards possible.

**BTS** bases its quality and management on  
**SABS 0157** and **ISO 9002**.

All required third party inspection is sub-contracted to independent inspection authorities. Data books and documentation can be compiled to meet our client's requirements.

The company produces welding to the following standards:

Structural welding **AWS A15/8** or **AWS A5/1**  
Pipe welding **ASME IX** or **API 1104**  
Platework or Vessels to **BS2654**
